

TELEPHONE CONVERSATION RECORDDATE: 14 February 1994
TIME: ----

<u>Originators</u>	<u>Title</u>	<u>Location</u>	<u>Number</u>
JIM COLTER	RPM	NORTHNAVAFACENGCOM	(215) 595-0567
<u>Persons Called</u>	<u>Title</u>	<u>Location</u>	<u>Number</u>
JOHN OHLMANN	HEAD ENV.	GRUMMAN CORP.	(516) 575-2385

Subject: DRAFT RESPONSES TO FS COMMENTS

I called John to ask him if he or his consultant, Geraghty & Miller, had any problems with the way we responded to their comments. He apologized for not getting back with me sooner, but said that neither he nor his consultant had any problems with our responses. I thanked him and told him that we would be finalizing the FS shortly.

We also talked about a conversation we had earlier regarding John Molloy's interpretation of Grumman paying for treatment on both Plants 4 and 5 of the Bethpage Water District. Earlier, John had told me that he would talk to his lawyers to verify what John Molloy had said. John Ohlmann's first response was that he thought that we had agreed at the last TRC meeting that Grumman would put treatment on Plant 4 and that the Navy would put treatment on Plant 5. I agreed and said that is what I remembered but that John Molloy tells a different story.

During this conversation, John Ohlmann said that he had talked with his lawyers and also with John Molloy and explained to him that Grumman's plans only included treatment on BWD Plant #4 and that they were looking at the Navy to take care of Plant #5. I thanked John for clearing this matter up and that our PRAP will indicate that treatment for Plant #5 will be provided.
